

ASSIGNMENT – 02

Study of iQOO Neo 9 Pro as an IoT Edge Device

Introduction

iQOO Neo 9 Pro ek advanced smartphone hai jo IoT edge device ke roop mein kaam kar sakta hai. IoT edge devices real-world data collect karte hain, usko locally process karte hain aur cloud ya dusre devices ke saath communicate karte hain.

1. Hardware Components

Processor and Graphics

- Qualcomm Snapdragon 8 Gen 2 processor
- Adreno GPU

Memory and Storage

- 8GB / 12GB RAM
- 128GB / 256GB storage

Battery

- 5160mAh battery

Display and Input

- 6.78-inch AMOLED display

Camera

- 50MP rear camera
- 16MP front camera

Connectivity

- Wi-Fi, Bluetooth, 5G support

2. Operating System

- Android 14
- Funtouch OS

Functions:

- Resource management
- Application execution
- Security features
- Network management

- Sensor access

3. Sensors

- Accelerometer
- Gyroscope
- Proximity sensor
- Ambient light sensor
- Fingerprint sensor
- Compass
- GPS

4. IoT Edge Device Functions

- Data collection
- Local processing
- Communication
- Decision making

5. Conclusion

iQOO Neo 9 Pro ek powerful IoT edge device hai jo high-performance hardware, modern OS aur sensors ke combination se efficient data processing aur communication provide karta hai.
